**New Medical Centre Set To Deliver 1st Class Healthcare From 'Landmark' Building**

**Bosmere Medical Centre, Havant, Hampshire**

To mark an exciting stage in the development of the Bosmere Medical Practice's surgery in Havant, Portsmouth, Ashley House arranged with the GP's and staff to have a 'Topping Out' ceremony. This marked the beginning of the final phase of the external construction of the healthcare development.

This excellent new facility will offer patients a family friendly service with efficient and easy access to a highly trained team. The practice has 9 doctors and a team of 7 nurses supported by over 20 staff members.

The new surgery premises, which will include a Pharmacy will provide modern healthcare services from a 'one-stop shop' with a vastly improved environment for patients and enhanced and pleasant working conditions for clinicians and staff. The GPs are enthusiastic about the capacity their new premises will provide for keeping the patient list open, offering new services to the wider community and the potential to offer consultant sessions on site.

At the outset, Ashley House plc were appointed to facilitate the relocation of the practice out of the existing multi-occupied, busy Havant Health Centre, to a site where the Practice could expand into new sole occupancy premises. The move will enable the other Practices in the Health Centre to expand into the vacated space.
