

Wellsbourne Health Centre celebrates the beginning of its development with a turf cutting ceremony

This innovative development brings together two GP surgeries:

- Broadway and Whitehawk Clinic

As well as

- South Downs Health Services, including District nursing, Community Dentistry and Podiatry
- Space for expansion/additional services
- Pharmacy

When it opens in early 2010, the new building will have a shared entrance with the existing Whitehawk Children and Families Centre which opened in 2006, creating a single access point to a range of health and community services for the local population of Whitehawk, and providing opportunities for joint working across organisations.

The two practices will go into the building as separate surgeries and share certain facilities, however the building has been designed to allow for a future merger of the practices. It will be an eco friendly building, including a ground source heat pump and a bio-diverse (green) roof.

Ashley House have purchased a long leasehold interest in the land from Brighton Council. The initial 25 year lease will be held by the PCT. This is the fourth primary care facility to be constructed by Ashley House in Brighton
